

Stomix launches a new insulation system stomixTHERM® PRIMA providing a less costly and simpler solution for your home

The product portfolio of Stomix company has grown by a **brand new item**, which is a **new insulation system stomixTHERM PRIMA**. It offers a reliable solution for higher thermal comfort and significant financial savings on heating while being **economically attractive option** to the already established systems with polystyrene insulation boards.

The technological solution of **stomixTHERM PRIMA** is based mainly on the use of universal adhesive and levelling product AlfaFIX S1P, which also extends the already tested product range of similar products under the same brand. StomixTHERM PRIMA system meets the strictest European standards by holding CE certificate and thus provides a **minimum guarantee of 25 years**.

The basic condition of its **long-term durability and functionality lies in perfect application**. The company therefore provides a number of free consulting services, e.g. supervision, tailored design of insulation and technology supervision during application. The staff are also able to provide trainings of realization companies or organize more complex revitalization works.

StomixTHERM PRIMA conveniently combines with a wide range of renders to ensure a perfect final design. Among other options there are colored acrylic and silicone renders such as BetaDEKOR or mineral renders with silicone-acrylate or silicone of GamaDEKOR range. The usage of **stomixTHERM PRIMA** is limited to 12 meters of height.
